

AUGUST SPECIALS

If you thought you couldn't upgrade to digital avionics, here is a VFR package of new Garmin radios. It includes a Garmin GTR225 Digital Transceiver, GTX327 Mode A/C Transponder, Panel mounted AERA500 Portable GPS, and a new ACK A30.9 Blind Encoder. Total package installed for \$5,995.00.

If you are looking to upgrade your aircraft panel to IFR, here is a package that could work for you. It includes a Garmin GMA340 Audio Panel with built in intercom, GTN650 GPS/WAAS/Com/Nav/Glideslope, GNC255A Digital Nav/Comm, 2 GI106A CDIs, GTX327 Transponder, and a new ACK A30.9 Blind Encoder. Total package installed for \$26,495.00, less Garmin rebate of \$500.00, for a grand total of \$25,995.00.

S-TEC Autopilot System 20 is a single axis, roll stabilization turn command, NAV/LOC/GPS tracking autopilot. Zero additional panel space is required as the programmer/ computer, annunciators and servo amplifier are entirely contained within the turn coordinator. Total installed price of the System 20 is \$9,945.00. Or upgrade to a System 30 and get all the features of the System 20 along with altitude hold. Total installed price of the System 30 \$15,795.00.

Move up to a glass panel with Aspen Avionics' Evolution 1000 VFR PFD. The PFD will replace the mechanical "six pack" onto one flat panel LCD display. This affordable PFD is field upgradeable to the full feature Evolution 1000 IFR PFD which includes an HSI and glideslope indication. Installed, the VFR PFD is \$6,895.00, and the Evolution 1000 IFR PFD is \$11,995.00.

!! SCHEDULE YOUR INSTALLATION BY AUGUST 30TH TO TAKE ADVANTAGE OF THESE SAVINGS !!
